

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #120 AUGUST 31, 2020

DAILY HIGHLIGHTS

Globally, COVID-19 cases have surpassed 25.11 million with more than 844,000 deaths.

The total number of cases in the U.S. increased from 5,845,876 as reported on Friday 8/28/2020 to 5,972,356 reported today. The number of deaths in the U.S. increased from 180,165 to 182,622.

California has a new blueprint for reducing COVID-19 in the state with revised criteria for loosening and tightening restrictions on activities. To find out how businesses and activities can open in your county, [click here](#).

According to CNN and other credible news sources, the Centers for Disease Control and Prevention (CDC) has modified their current testing guidelines for those suspected of having COVID-19. The new testing guidelines exclude individuals with no COVID-19 symptoms, even if you have been in close contact (within 6 feet) of a person with COVID-19 infection for at least 15 minutes. Many public health experts disagree with this change. Governor Newsom has chosen to continue adhering to the previous testing guidelines. To review the CDC's testing guidelines for the coronavirus, please [click here](#).

Lessons from the Front Lines calls are a joint effort between CMS Administrator Seema Verma, FDA Commissioner Stephen Hahn, MD, and the White House Coronavirus Task Force. Physicians and other clinicians are invited to share their experience, ideas, strategies, and insights with one another related to their COVID-19 response. There is an opportunity to ask questions of presenters. These calls are not intended for the press. The webinar will take place Friday, September 4, 2020 from 12:30-2:00 PM EST. Toll free attendee dial-in: 833-614-0820. To join the webinar, [click here](#) (Access Passcode: 3374248).

If you are evacuated due to wildfires, bring a face covering and hand sanitizer, and continue to practice physical distancing when possible to protect against COVID-19. Learn more about how to protect yourself and your family [here](#).

UNITED STATES

COVID-19: U.S. at a Glance*

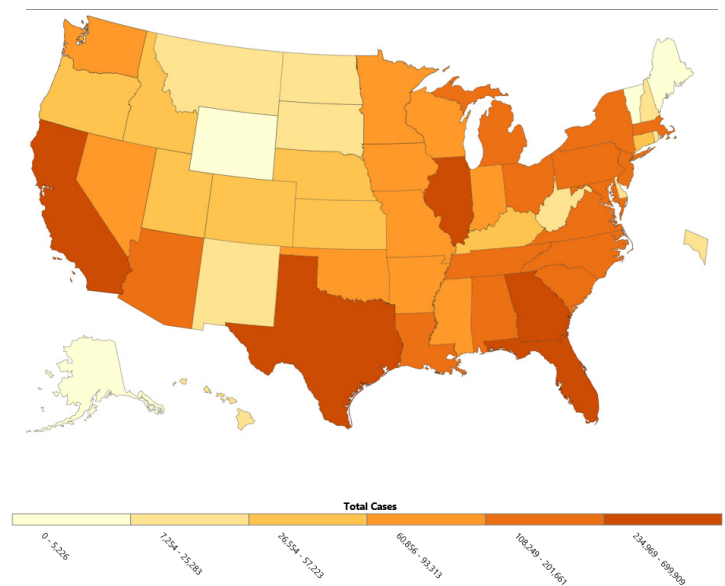

- Total cases: 5,972,356
- Total deaths: 182,622
- Jurisdictions reporting cases: 55 (50 states, District of Columbia, Guam, Puerto Rico, the Northern Mariana Islands, and the U.S. Virgin Islands)

*As of April 14, 2020, CDC case counts and death counts include both confirmed and probable cases and deaths. This change was made to reflect an interim COVID-19 position statement issued by the Council for State and Territorial Epidemiologists on April 5, 2020. The position statement included a case definition and made COVID-19 a nationally notifiable disease.

A confirmed case or death is defined by meeting confirmatory laboratory evidence for COVID-19.

A probable case or death is defined by:
i) meeting clinical criteria AND epidemiologic evidence with no confirmatory laboratory testing performed for COVID-19; or ii) meeting presumptive laboratory evidence AND either clinical criteria OR epidemiologic evidence; or iii) meeting vital records criteria with no confirmatory laboratory testing performed for COVID-19.

State and local public health departments are now testing and publicly reporting their cases. In the event of a discrepancy between CDC cases and cases reported by state and local public health officials, data reported by states should be considered the most up to date.

National Laboratory Testing Data

- Total tests reported: 84,119,890
- Positive tests reported: 7,250,402
- Percent of positive tests: 9%

CORONAVIRUS DISEASE 2019 (COVID-19) SITUATIONAL REPORT #120 AUGUST 31, 2020

*as of 11:59PM EST August 29, 2020

CALIFORNIA

As of August 30, 2020, there were a total of 704,085 positive cases and 12,933 deaths in California.

Ages of all confirmed positive cases:

- Age 0-17: 71,224 cases
- Age 18-49: 422,691 cases
- Age 50-64: 133,533 cases
- Age 65 and older: 75,729 cases
- Unknown/Missing: 908 cases

Gender of all confirmed positive cases:

- Female: 355,181 cases
- Male: 342,297 cases
- Unknown: 6,607 cases

Lab tests reported statewide: 11,373,305

Twenty-five public health labs in California are testing samples for COVID-19. These labs include the California Department of Public Health's Laboratory in Richmond, Alameda, Butte, Contra Costa, Fresno, Humboldt, Imperial, Long Beach, Los Angeles, Monterey, Napa-Solano-Yolo-Marin (located in Solano), Orange, Riverside, Sacramento, San Bernardino, San Diego, San Francisco, San Joaquin, San Luis Obispo, San Mateo, Santa Clara, Shasta, Sonoma, Tulare and Ventura County public health laboratories. The Richmond Laboratory will provide diagnostic testing within a 48-hour turnaround time. This means California public health officials will get test results sooner, so that patients will get the best care.

Click [HERE](#) to find your nearest testing site.

INDIAN HEALTH SERVICE CALIFORNIA AREA

9,788 Tribal or Urban Indian Health Program patients in the California Area have been tested for COVID-19 as of 8/29/2020.

Of these, 641 patients have tested positive for COVID-19 and 8,385 have tested negative for COVID-19.

If you have any questions or concerns please contact:

Vanesscia Cresci at vcresci@crihb.org or Aurimar Ayala at aayala@crihb.org

CONFIRMED CASES AND DEATHS BY COUNTY

Counties with most reported cases

Los Angeles	240,775
Riverside	52,227
Orange	47,283

Racial distribution of confirmed COVID-19 cases and deaths in California

American Indians and Alaska Natives account for 0.5% percent of the population, **0.2% of COVID-19 cases**, and **0.3% of deaths** in California. This includes a total of **1,158 cases** and **40 deaths** among American Indian and Alaska Native people in California.

Note: 33% of cases and 2% of deaths are of unknown race/ethnicity. As of 8/31/2020. Source: CDPH

Two sources for tracking American Indian and Alaska Native (AIAN) cases reported in California

Data from the **Indian Health Service (IHS)** include positive cases reported by Tribal and Urban Indian Health Programs.

Data from **California Department of Public Health (CDPH)** include all positive cases of AIAN diagnosed in California.

As of 8/31/2020. Source: IHS Data Portal. Note: Gaps in CDPH reported AIAN cases are due to intermittent availability. As of 8/31/2020. Source: CDPH

Positive Cases by Age Group among all California cases

Positive Cases by Gender among all California cases

As of 8/31/2020. Source: CDPH

In California:

0.6% of confirmed cases have been admitted to a hospital

0.1% of confirmed cases have been admitted to an Intensive Care Unit

1.8% of cases have died

Case and death disparities:

- For all adults ages 18+, Latinos and African Americans are dying at disproportionately high rates. The proportion of COVID-19 deaths in Latinos is more than 1.3 times their population representation across all adult age categories.
- More males (57%) are dying from COVID-19 than females (43%).

As of 8/31/2020. Source: CDPH

American Indian and Alaska Native (AIAN) data reported by California to the Centers for Disease Control and Prevention (CDC)

Positive COVID-19 cases among AIAN people in California by Age Group and Gender

COVID-19 deaths among AIAN people in California by Age Group and Gender

CDC data show that AIAN in California are testing positive for COVID-19 at rates lower than their proportion of California's population and dying at rates that are higher. This includes a total of **2,521 cases** and **72 deaths**.
